## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 4 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 2 recites that the light may have wavelengths. It is unclear if the claim requires the listed wavelengths.

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4, 6, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Shi et al., Youji Huaxue (1988), 8(1), 48-50 (Shi).

Shi teaches the following reaction that anticipates the rejected claims:

RX(1) RCT A 75-45-6  
RGT D 7782-44-7 O2  
PRO B 116-14-3, C 353-50-4  
NTE laser irradsn.  
See attached CAS online citation.

Claims 1, 4, 6, 8 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by Kuzmenko et al., Zhurnal Fizicheskoi Khimii (1989) 63(7), 1911-12 (Kuzmenko).

Kuzmenko teaches irradiation of CF<sub>2</sub>HCl in the presence of oxygen, and anticipates the rejected claims.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 3, 5 and 7, 10 and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shi and Kuzmenko, supra.

The rejected claims cover embodiments covering parameters such as temperature, pressure and molar amounts, which, are well within the purview of those of

ordinary skill, for the purposes of optimizing the process, and are thus prima facie obvious.
